## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 11, 25, 27, 33, 44, 49, 55 and 69-83 are rejected under 35 U.S.C. 102(b) as being anticipated by Brifman et al. (Cited art paper # 5).

Regarding claims 1, 11, 25, 27, 33, 44, 49 and 55 Brifman discloses a system having a master controller, a slave controller including a solid-state switch 26, a measuring element 30, and a processing element 18 (figure 1).

Regarding claims 69-83, the system of Brifman inherently discloses the method of remotely controlling an input current.

### ***Allowable Subject Matter***

3. Claims 2-10, 12-24, 26, 28-32, 34-43, 45-48, 50-54 and 56-68 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### ***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Karuppана et al., Norman et al. and Witmer disclose related art.
